This is not the full law. Consult Fish and Wildlife for further details. All persons are reminded that the statutes, code and regulations are the legal authorities. New Jersey Fish and Wildlife receives federal assistance from the U.S. Fish and Wildlife Service and thus prohibits discrimination on the basis of race, color, national origin, disability, age and sex pursuant to Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975 and Title IX of the Educational Amendments of 1972. If you believe that you have been discriminated against in any program, activity or service, contact New Jersey Fish and Wildlife, MCS01-03, P.O. Box 420, Trenton, NJ 08626-0420. The telephone number is (609) 292-9410. You may also write to the Office of Civil Rights, Department of the Interior, 1849 C Street, NW Washington, DC 20240.
Great saltwater fishing opportunities always await anyone lucky enough to visit coastal New Jersey. Whether you fish the surf, back-bays or open ocean, the Garden State boasts one of the most active and productive recreational fisheries on the Atlantic Coast!

Of all the species in our marine waters, most anglers will fish for the “Big Five”. These include bluefish, striped bass, summer flounder, black sea bass and tautog. If these are the species you’re targeting, check out “The Big Five” article in this edition of the Marine Digest, where you will find details on current research, best fishing methods and some fun facts. For instance, did you know that in 1878, striped bass collected from the Navesink River were transported by rail and successfully introduced to the waters of California? See page 6 for more.

The fun fact shows that the New Jersey Department of Environmental Protection’s Fish and Wildlife staff has been managing the State’s wildlife resources for a long time. In fact, this year marks the 130th anniversary of our agency, when in 1892 the Board of Fish and Game Commissioners hired the first salaried “Fish and Game Protector” to enforce the fishing and game laws within the state. Since that time, our Law Enforcement bureau has expanded to include 56 highly trained Conservation Police Officers who patrol the marine and inland environments of New Jersey. They do their part to protect your natural resources and keep the public safe, so please do your part — understand and follow the marine regulations and properly handle fish being released.

As I’m writing this message, COVID cases are down, and life is slowly resembling pre-pandemic conditions. Fish and Wildlife’s Marine Fisheries staff are back out in the field. They conduct surveys and collect information vital to sustainable management of our state’s unique and important marine resources. All of this is very exciting! Our biologists like being on the water as much as you do, and prior to the pandemic I would have said there was nothing that would stop them from getting out there to carry out their sampling. When COVID hit, however, most of the agency’s marine fisheries sampling programs came to a halt. The health and safety of the public and our employees always comes first, and during the pandemic the logistics of sampling in close quarters on small vessels resulted in many of our surveys being pared back or fully cancelled for two full sampling seasons in 2020 and 2021.

Successful fisheries management depends on up-to-date and reliable data on stock condition, removals and fishing effort. While the agency’s Marine Fisheries staff were not able to get out on the water, New Jersey anglers remained active throughout the pandemic. Our staff’s “pause” on sampling provided a chance for us to re-think data collection in a digital age and resulted in the expansion of opportunities for anglers and other stakeholders to participate in the fisheries management process. As such, we developed additional platforms to report recreational fishing through the volunteer angler survey: www.nj.gov/dep/marineanglersurvey and for reporting endangered and protected marine species: www.nj.gov/dep/njmarinewildlife. The striped bass bonus program application process also went to a 100% online format: www.njfishandwildlife.org/bonusbas.htm.

Meetings of the Marine Fisheries Council and Shellfisheries Councils were also shifted to virtual platforms to allow continued public participation. This ability to pivot quickly to a virtual platform allowed the public to stay engaged and participate in marine fisheries management.

I urge you all to continue to participate in the management process and to attend an upcoming Marine Fisheries Council meeting. Information about upcoming meetings is posted on our website at NJFishandWildlife.com.

It’s time to get out there — be safe on the water, enjoy your time outdoors, and catch some fish!

Dave Golden is the Assistant Commissioner of New Jersey DEP Fish and Wildlife.
When you purchase fishing equipment, motors, sonar and motorboat fuel in New Jersey, excise tax dollars – paid by manufacturers of that equipment – come back to New Jersey to support marine fisheries! This is the federal Sport Fish Restoration Program.

Your fees and federal Sport Fish Restoration dollars produce the following benefits:

- Management of public waters
- Artificial reef development
- Marine sport fish research
- Development and management of public fishing areas
- Creation of aquatic education programs
- Development and maintenance of boating-associated access facilities throughout the state

Better fishing and boating-associated recreation and aquatic education increase the public’s understanding of water resources and aquatic life.
Mark Your Calendar for the Governor's Surf Fishing Tournament!

May 15, 2022
Island Beach State Park, Seaside Park, NJ

Enjoy a great day of surf fishing with family and friends at the Governor's Surf Fishing Tournament.

The individual who catches the overall largest fish wins the “Governor’s Award” and will have their name engraved on the Governor’s Cup, which is permanently displayed at Island Beach State Park. Prizes are awarded to winners in a variety of age group and fish species categories.

All funds raised by the tournament go toward improving beach access, surf fishing instruction programs and equipment plus marine education and restoration projects.

The tournament is sponsored by NJDEP’s Fish and Wildlife and Parks and Forestry, New Jersey State Federation of Sportsmen’s Clubs, Jersey Coast Anglers Association and New Jersey Beach Buggy Association.

For more information visit: NJFishandWildlife.com/gsft.htm or call 609-748-4347.

Operation Game Thief

Report Abuse of our Outdoor Heritage!

1-855-OGT-TIPS

24 Hours a Day, Seven Days a Week

The person who poaches, pollutes habitat and abuses public land tarnishes the image of sportsmen and robs us of our fish and wildlife as well as tax and license dollars. You can make a difference.

Call OGT to report:

• Negligent use of firearms
• Over the limits for game and fish
• Commercial exploitation of fish and wildlife
• Pollution of habitat, dumping on state land
• Destruction of signs and state property
• Illegal killing, taking or possession of any wildlife

It’s Free. It’s Confidential.
You May Be Eligible for a Reward.

Funded by the New Jersey State Federation of Sportsmen’s Clubs. Designed to encourage sportsmen to report poaching and wildlife crimes.

New Jersey DEP Fish and Wildlife
Our Mission

To protect and manage the state’s fish and wildlife to maximize their long-term biological, recreational and economic value for all New Jerseyans.

Our Goals

• To maintain New Jersey’s rich variety of fish and wildlife species at stable, healthy levels and to protect and enhance the many habitats on which they depend.
• To educate New Jerseyans on the values and needs of our fish and wildlife and to foster a positive human/wildlife co-existence.
• To maximize the recreational and commercial use of New Jersey’s fish and wildlife for both present and future generations.
The Striped Bass Bonus Program will continue in 2022, where anglers possessing a Bonus permit may keep a striped at 24 inches to less than 28 inches. The open season for this program is May 15 through December 31. Check website for updates at NJFishandWildlife.com/bonusbas.htm.

The current allocation from the Atlantic States Marine Fisheries Commission is 215,912 pounds. Should New Jersey exceed this quota, any overage would be subtracted from the following year’s quota.

**Application Process:** Striped Bass Bonus Program permits are issued via mail only. Go to NJFishandWildlife.com/bonusbas.htm to apply and for regulation or program updates. The permit is non-transferable and valid for the current calendar year. Only one fish can be harvested per permit. Fishing logs must be kept and harvest reporting is mandatory.

**Striped Bass Bonus Permit Harvest Reporting:** The Striped Bass Bonus Permit must be securely attached to the fish through the mouth immediately upon capture and prior to transportation. Harvest reporting is mandatory and must be reported online or by leaving a message at (609) 748-2074.

**Fishing Logs:** A log of striped bass fishing activity must be kept and submitted by January 15, 2023 in order to remain eligible for 2023.

### Added Tips for the Survival of Released Fish

**Fish Handling Best Practices**
- Keep the fish in the water when de-hooking.
- If you must take the fish out of the water, use a rubber or soft-mesh landing net.
- Avoid handling fish with dry hands.
- Avoid dragging fish across dry sand or rocks.
- Hold fish horizontal with support.
- Avoid touching the fish’s gills or eyes.

**Tackle Recommendations**
- Use barbless hooks or bend barbs down.
- Use non-stainless steel hooks. If gut-hooked, leave the hook in the fish and cut the line as close to the hook as possible. The hook will rust away.
- Replace treble hooks on artificial lures with single hooks.
- Use appropriate tackle suited to the size of the fish; don’t fight the fish to exhaustion.

## When Fishing with Bait for Striped Bass

**What is a Circle Hook?**

A circle hook is defined as a non-offset hook where the point curves back perpendicularly towards the shank. The term non-offset means the point and barb are in the same plane as the shank. When the hook is laying on a flat surface, the entire hook and barb should lay flat.

### How Do Circle Hooks Increase Survival of Released Striped Bass?

Using circle hooks reduces occurrences of gut-hooking which can cause injuries to internal organs of the fish. If a striped bass swallows the bait, the circle hook is designed to slide out from its throat and catch on the corner of its jaw. When a fish is hooked in the corner of its jaw, this also leads to shorter de-hooking times and less overall stress on the fish.

**Tips for Using Circle Hooks**

When a fish takes your bait, do not sweep the rod upward to set the hook. Using circle hooks significantly increases survival of released fish. In 2020, more striped bass were estimated to have died from catch and release than were harvested — 2.76 million fish and 1.71 million fish, respectively.

When Fishing Logs:
- A log of striped bass fishing activity must be kept and submitted by January 15, 2023 in order to remain eligible for 2023.
