Since its inception in 1984, Fish and Wildlife’s Reef Program has been very proactive in reef construction efforts. As New Jersey’s artificial reef network grew and the volume of materials deployed to create them increased, reefs quickly became popular locations for recreational anglers and commercial fishermen utilizing potting gear. However, as early as 1989, charter and individual boat owners indicated that the presence of fish pots and lobster pots on reefs was beginning to preclude access.

As reef building efforts continued into the 2000s, conflicts between recreational and commercial users continued to rise. Federal officials representing the Sport Fish Restoration Program stated that this situation must be resolved because anglers had paid for these reefs through excise taxes on marine gas and fishing tackle; one user group should not be allowed to dominate access. Following this admonishment, on April 11th, 2011, more than $250,000 in Sport Fish Restoration funding for New Jersey’s Program was discontinued for use in reef construction and monitoring activities. These funds were not lost, just redistributed to other Fish and Wildlife projects. It was further explained that once access to reefs was restored to recreational users, funding could once again be utilized for the Reef Program.

To alleviate these conflicts and ultimately restore access to recreational anglers, in March 2013, New Jersey DEP Commissioner Bob Martin worked with representatives from the recreational and commercial fishing sectors to develop a plan for balancing access on reefs located in state waters. Since that time, Fish and Wildlife staff has been working diligently towards implementing this plan. A component of the plan also includes the construction of a new reef where potting gear will be prohibited. In essence, the plan sets the stage for the future and will translate into more benefits for all reef users.

This edition of the Marine Digest has an article (see page 6) focusing on the specifics of Commissioner Martin’s compromise as well as other beneficial proposed changes to the Reef Program.

Also directly related to our Reef Program and artificial reefs, readers will find an informative “how to” article on spearfishing in New Jersey. (See page 20.) Spearfishing is growing in popularity; we offer insights and techniques for this exciting form of recreation. Recently, Fish and Wildlife added a new category to our Record Fish Program for “speargun hunters” to recognize their outstanding achievements.

New Jersey’s Reef Program is recognized as being the best in the nation; our reefs are second to none for spearfishing, scuba diving and fishing. In the Program’s 31 year history, more than 7 million cubic yards of materials have been deployed to create artificial reefs. These materials consist primarily of rock, vessels, designed habitats (reef balls) and other materials of opportunity.

In a study conducted by the DEP, it was determined that reefs accounted for 18 percent of all of the fish caught in marine waters. In other words, roughly two out of every 11 fish caught along the Jersey shore were caught on a reef — an amazing statistic! The future of Fish and Wildlife’s Reef Program is bright. We will continue to be dynamic in adjusting our goals and objectives to meet the needs of resource users wisely.

Dave Chanda is the Director of the Division of Fish and Wildlife.
We’re Here to Save Your Day

Although our Captains don’t really dress like super heroes, if your day on the water goes south, they can help you turn it around. Our captains are confident, qualified, licensed and ready to assist at a moment’s notice. New Jersey Division of Fish and Wildlife
Our Mission
To protect and manage the state’s fish and wildlife to maximize their long-term biological, recreational and economic value for all New Jerseyans.

Our Goals
• To maintain New Jersey’s rich variety of fish and wildlife species at stable, healthy levels and to protect and enhance the many habitats on which they depend.
• To educate New Jerseyans on the values and needs of our fish and wildlife and to foster a positive human/wildlife co-existence.
• To maximize the recreational and commercial use of New Jersey’s fish and wildlife for both present and future generations.
Summer Flounder

A Profile

By Maryellen Gordon, Senior Fisheries Biologist | Lauren “Maggie” Sager, Seasonal Fisheries Technician | Bryan Carter, Seasonal Fisheries Technician 
Jonathan Klotz, Seasonal Fisheries Technician | Erin Mulvenna, Seasonal Fisheries Technician

Common Names: summer flounder, fluke
Scientific Name: Paralichthys dentatus
Range: Nova Scotia south to eastern Florida, but most common in the Mid-Atlantic region.
Size: Males can grow to over 2 feet, with larger females reaching lengths up to 3 feet.

Biological Characteristics: Like all flounder, adult summer flounder are flat-bodied. They are white below and range from shades of brown to grey above, with a scattering of distinct, dark identifying spots. Summer flounder have the ability to change their coloring in order to blend with their environment. Summer flounder are considered “left-eyed,” when viewed from above, both eyes are typically on the left side of the body, although rarely a right-eyed variation may occur.

Habitat: Hard, sandy bottoms and salt marsh creeks or seagrass beds with muddy or silty substrate.

Food and Feeding: Larval summer flounder feed primarily on zooplankton, juveniles mainly on crustaceans and adults are opportunistic predators. Their ability to camouflage themselves with the substrate where they spend most of their lives makes them highly efficient ambush predators. Numerous, well-developed teeth allow adult summer flounder to feed on a range of prey, including crustaceans, small fish, squid and sea worms. Summer flounder most actively feed during daylight hours.

Spawning: Summer flounder typically begin spawning around age two to three, with males averaging 10 inches and females averaging 12.5 inches in length. Spawning occurs in the fall and winter (peaking in October and November) when summer flounder migrate from coastal to offshore waters to depths between 120 and 600 feet. Spawning is directly linked to sexual maturity, with older, larger fish migrating first. Since flounder spawn several times per season, a large female may release up to 4 million eggs in a single year. Larval flounder, or fry, begin life in the water column and migrate inshore to shallow coastal nurseries. Here they settle into the sediment and develop their adult form, with the body flattening and the right eye migrating over the top of the head to the left side.

Migration: Their migration patterns are strongly tied to water temperature, with adults spending the warm summer months on the sea floor in shallow coastal waters before migrating to the outer edge of the continental shelf as fall temperatures drop.

Commercial/Recreational Importance: Summer flounder are considered one of the most important and sought-after fish in New Jersey, primarily for their great tasting meat. Restaurants, bait and tackle shops, charter and head boats plus beach townships all benefit economically from the influx of both local and visiting anglers who target summer flounder along the New Jersey coastline each summer. The New Jersey commercial summer flounder fishery accounts for a large portion of the summer flounder sold in restaurants and super markets. However, the recreational fishery is equally important in New Jersey. Recreational anglers support the local businesses, enjoy the activity of fishing for summer flounder and can then take part in a fresh, home-cooked meal.

Fishing Methods: Summer flounder can be caught using a variety of methods, one of which is by using a bucktail teaser rig. The bucktail acts as the weight on the bottom of a leader, and a second hook is placed 12–24 inches above on a dropper loop. Both hooks can be tipped with an artificially scented soft plastic lure that summer flounder can’t resist. Using light tackle such as 5- to 7-foot medium-action rods and 10 lb. mono/20 lb. braided line is necessary to feel the sensitive bite of a summer flounder.

Applying a small, but rapid vertical jigging action to the rod will present the bucktail and lure like an injured baitfish, often resulting in a strike from a summer flounder. Since these fish are visual predators, the presented bait should be moving constantly to attract their attention. This usually requires shore-based anglers to continually cast and retrieve; boat anglers drift rather than anchor in one spot.

Summer flounder do not produce drag-ripping fights such as bluefish and striped bass, but can still be sporty on light tackle, especially from boats where their flat profile creates a lot of water resistance. Making up for their lack of fighting skills, summer flounder can often be caught in large quantities in one fishing trip.

If a summer flounder is caught along a certain stretch of beach or near a certain underwater feature, continue fishing that same area and you will often catch more fish. When fishing from shore, it is important to work the bucktail right up to the beach. Summer flounder often settle close against the beach lip, feeding on baitfish and crabs washed seaward off the beach face. Typically, most summer flounder caught from the surf are hooked less than 20 yards from shore.

A Clear Revival for New Jersey’s Artificial Reef Program

By Hugh Carberry, Reef Coordinator

The federal Sport Fish Restoration Program funding for New Jersey’s Artificial Reef Program was discontinued on April 12, 2011 by federal officials due to spatial conflicts between anglers and recreational plus commercial fishers using potting gear. Federal officials stated that the Sport Fish Restoration funding source is a “user pays—user benefits” program and that the presence of potting gear precludes access to reefs for which anglers have paid for through excise taxes. These officials further explained that funding would be restored when appropriate action was taken.

Since that time, the New Jersey Department of Environmental Protection (DEP) has worked diligently with representatives from the recreational and commercial sectors in developing a fair plan to balance access on reefs located in marine state waters. The plan includes designating specific locations within these reefs where potting gear can be set and the creation of a new reef in marine state waters where potting gear will be prohibited. The DEP also vowed to petition the Mid-Atlantic Fisheries Management Council for Special Management Zone regulations for the 13 reefs located in Exclusive Economic Zone once regulations are in place for reefs in marine state waters. The purpose of the Special Management Zone designation is to establish management authority that would allow for options that prohibit or restrain the use of specific types of fishing gear that are not compatible with the intent of the artificial reef.

Under the DEP’s plan to balance access, regulations will set aside a portion of the Sandy Hook Reef and two sections of the Axel Carlson Reef to be designated as Full Access Zones. These will be areas where potting gear can be set. Anglers will not be prohibited from utilizing the Full Access Zones but run the risk of losing terminal fishing tackle on submerged potting gear and the associated ground lines between pots. All other forms of commercial fishing will be allowed on these reefs in their entirety, including the Full Access Zones.

Once the Full Access Zone regulations are in place, the DEP has vowed to petition the Mid-Atlantic Fisheries Management Council for Special Management Zone regulations for the 13 reefs located in the Exclusive Economic Zone. The purpose of the Special Management Zone designation is to establish management authority that would allow for options that prohibit or restrain the use of specific types of fishing gear that are not compatible with the intent of the artificial reef.

Another component of the DEP’s plan to balance access includes the creation of a new reef north of Barnegat Inlet where potting gear will be prohibited. The reef will be located in marine state waters and its size will equate to the total area of the three Full Access Zones contained within the Sandy Hook and Axel Carlson Reefs (0.95 mi²). Through exclusionary mapping, Fish and Wildlife’s marine biologists will select a location having adequate depth and substrate that will not adversely impact commercial fishing operations and will not be near productive areas such as rock outcroppings and other live bottom, shipping lanes, anchorages and telecommunication cables. If all the components of the DEP’s proposals to balance access reach fruition, the new reef will be ready for construction during the spring of 2016.
A separate DEP proposal outside the plan to balance access is the creation of a new reef in Delaware Bay. For the past ten years Fish and Wildlife has received hundreds of requests from anglers from the ports of Fortescue, Cape May, Matt’s Landing, Bidwell Creek and Dennis Creek to construct reefs in the bay. Anglers from these ports contended that the State of Delaware’s reefs within the bay are extremely productive and that New Jersey’s Reef Program should move forward with reefs in Delaware Bay to increase recreational opportunities.

After much consideration, Fish and Wildlife elected to move forward with obtaining necessary approvals to construct a new reef in Delaware Bay. Our main concern with reef construction in this area is that juvenile game fishes such as weakfish, striped bass, black sea bass and tautog use the upper Delaware Bay estuary as a nursery area. Reefs will concentrate juvenile and sublegal fishes making them vulnerable to catch by hook and line, potentially resulting in hooking mortality.

To avoid this possible outcome, the DEP chose to consider only one location in the lower Bay where the likelihood of hooking juveniles and sublegal fishes would be significantly reduced. For the past two years, Fish and Wildlife, has been working diligently towards this goal. The first hurdle was proposing a change in the Coastal Zone Management rules.

Working with DEP officials from Coastal Management, a change in the Coastal Zone Management rules was proposed which would allow for the construction of an artificial reef in lower Delaware Bay. Since the inception of New Jersey’s Reef Program in 1984, the Coastal Zone Management rules stated unequivocally that reefs were only to be constructed in the ocean. The proposed rule change appeared in the June 2014 New Jersey Register for a 30-day public comment period. Although the proposed rule change has not yet been officially adopted, it is anticipated that this change will be in effect by June 2, 2015.

This change is the first initial step towards constructing a reef in the lower Delaware Bay. However, other crucial steps include meeting with representatives from the commercial fishing industries from the Delaware Bay area to receive their input. Our main focus on selecting a potential location will be to choose an area that is equidistant from all ports that have adequate depth and substrate composition that will not interfere with established shipping lanes.
If our efforts are successful, the proposed reef will be one mile in area and be comprised of low profile structures such as reef balls, dredge rock and demolition concrete and low vertical relief deck barges. The final outcome will be an outstanding location for anglers to catch tautog, summer flounder, black sea bass, striped bass and transient species such as sheepshead, spadefish and cobia. Similar to the new reef being proposed further north as part of the DEP’s plan to balance access, potting type gear will be prohibited at the proposed lower Delaware Bay reef.

The last exciting change regarding the Reef Program is a Memorandum of Understanding that was developed by the DEP for any interested nonprofit organizations and reef material providers that want to participate with New Jersey’s Artificial Reef Program in building reefs. This agreement, when finalized, will serve as a catalyst for reeﬁng more vessels and other acceptable materials within New Jersey’s Reef Network in a quick and timely manner. The agreement is very speciﬁc in that it identiﬁes responsibilities of the DEP, nonprofit organizations, reef material providers and contractors for preparing and towing of vessels to reefs for deployment. Perhaps the greatest beneﬁt though will be a system set in place that will allow interested nonprofit organizations to serve as a repository for donations from ﬁshing clubs, scuba clubs and the Reef Program’s very popular adopt-a-reef and memorial reef programs.

New Jersey’s Reef Program is recognized nationally as being the most progressive and served as the model for other states now active in constructing artiﬁcial reefs. Our Program has reeﬁed more vessels and deployed a greater volume of materials than any other state in the nation, an amazing statistic given the size of New Jersey compared with other states having an active reef program such as Florida, California and North Carolina.

Although the conﬂicts that arose between recreational and commercial ﬁshers using potting gear were an unfortunate outcome, the measures proposed by the DEP to ameliorate access issues should satisfy federal oﬃcials from the Sport Fish Restoration Program. It is anticipated that our federal funding will be restored by the spring of 2016 and that New Jersey’s Reef Program will once again set the gold standard for other states to follow.
Governor's Surf Fishing Tournament

GET OUTSIDE & ENJOY A DAY OF FISHING WITH FAMILY AND FRIENDS

By Karen Byrne, Senior Biologist

Mark your calendar for May 17, 2015 when Island Beach State Park will host the 24th annual Governor's Surf Fishing Tournament! Hundreds of anglers from New Jersey and neighboring states are expected to hit the beach that day in hopes of catching the longest fish and to enjoy a great day of fishing with family and friends at the Jersey Shore.

The tournament aims to encourage youngsters and adults to learn more about surf fishing while taking advantage of a great family activity. Since its inception in 1991, the tournament has generated more than $130,000 for various marine education and restoration efforts, construction of access ramps for disabled saltwater anglers, surf fishing instruction programs and equipment and the purchase of the first mobile automatic heart defibrillator for use at Island Beach State Park. In 2014, funds from the tournament and partnering organizations provided Island Beach State Park with more than eight new specialized wheelchairs that provide beach access for the disabled and elderly.

Last year was the first time in tournament history that the event was not held in the fall. The change to May was beneficial with a significant increase in the number of participants over recent years. More than 600 anglers participated this year. A bluefish blitz kept tournament judges on the move with nearly 200 fish being measured. However, it was Chris Follmer of Hasbrouck Heights, NJ, who took the grand prize and New Jersey Governor's Cup with a 36-inch bluefish. Follmer received two rod-and-reel combinations plus a plaque; his name will be engraved on the Governor’s Cup on permanent display at the park.

New Jersey Lieutenant Governor Kim Guadagno was on hand to greet tournament participants and help present the awards after spending a day on the beach fishing with family and friends.

In addition to the Governor’s Cup winner, twenty anglers received rod and reel combinations for their prize-winning fish in the striped bass and bluefish categories. Overall fish length determined the grand prize winner, as well as first, second or third place in each of the species categories. There were categories for children, teen and adult anglers, including sub-categories for male and female anglers.

The Governor’s Surf Fishing Tournament is a great way for anglers of all ages and experience to enjoy a great day of fishing, and help kick off the start of the summer season at the Jersey shore. For more information about the Tournament, or to receive a registration form, visit NJFishandWildlife.com/gsft.htm or call (609) 748-4347.

Thank you!

New Jersey Division of Fish and Wildlife, along with our co-sponsors—the NJ State Park Service, NJ State Federation of Sportsmen’s Clubs, Jersey Coast Anglers Association and NJ Beach Buggy Association—would like to thank the following organizations for contributing to the success of the 23rd Annual Governor’s Surf Fishing Tournament in 2014:

- Sportsman’s Center
- Chestnut Neck Boat Yard
- Eagle Claw Fishing Tackle
- L&H Wood and Water
- Legal Limits Company
- Manns Bait Company
- Silver Horde
- Skunkbunker
- Stanley Jigs
- Canyon Gear
- Tica USA

In memoriam: We remember and thank Ken Jelnicki, Jr. who, for the past five years, donated a Surf Rocket, one of his custom-designed surf casters, as an early registration prize. Mr. Jelnicki passed away in January 2014 but will be remembered as being passionate about surf fishing and as someone always willing to help other anglers.

Tournament winner Chris Follmer of Hasbrouck Heights landed the top position with a 36-inch bluefish.

L-R: John Toth (Jersey Coast Angler Assoc.), Chris Follmer (Governor’s Cup winner), John Rogalo (NJ State Federation of Sportsmen’s Clubs), Lt. Governor Follmer (Governor’s Cup winner), Jon Carlucci/NJ DFW

Regulations remain in effect until changed. For the most current regulations, go to NJFishandWildlife.com/njregs.htm#marine or call the marine fish “listen-only” information line at (609) 292-2083. The Department of Environmental Protection’s Division of Fish and Wildlife informs anglers that rules for the recreational harvest of summer flounder (fluke), black sea bass, striped bass and lobster have changed.

- The recreational summer flounder open season has been modified to include May 22 to September 26.
- The black sea bass recreational minimum size remains at 12.5 inches. However, the recreational seasons and possession limits have changed. There is a 15 fish possession limit for May 27 to June 30, a two fish possession limit for July 1 to July 31, and a 15 fish possession limit for Oct. 22 to Dec. 31.
- The recreational striped bass size limit has changed to one fish at 28 inches to less than 43 inches and one fish at greater than or equal to 43 inches. The Striped Bass Bonus Program has been modified to one fish at 24 inches to less than 28 inches with a season of September 1 to December 31. See page 12 for additional program information.
- The lobster season has changed; there is no harvest or possession allowed from April 30 to May 31.
- Notice: New Federal regulations for the taking of blueline tilefish will likely be implemented in 2015. Visit our website at NJFishandWildlife.com or call the 24-hour marine fish “listen-only” information line at (609) 292-2083 for the latest regulation updates.

These changes were implemented for New Jersey to remain in compliance with the Atlantic States Marine Fisheries Commission’s management plans for summer flounder, black sea bass, striped bass and coastal sharks. The new rules are aimed at providing adequate protection to these fish stocks while allowing New Jersey’s saltwater recreational anglers to participate to the fullest extent possible in these various fisheries.

New Jersey recreational marine regulations apply to all fish species when they are possessed in state waters or landed in New Jersey regardless of where they are caught. Saltwater anglers must comply with the requirements of the New Jersey Saltwater Recreational Registry Program. See page 13.

Resource Information
Anyone who takes fisheries resources may be required to provide information on the species, number, weight or other information pertinent to management of resources. Anglers are encouraged to report all fishing activity after each trip. Visit Fish and Wildlife’s Volunteer Angler Survey at NJFishandWildlife.com/marinesurvey.htm.

Methods of Recreational Fishing
No person shall take, catch, kill or attempt to take, catch or kill any fish within the marine waters of the state by any means except in the manner commonly known as angling with hand line or rod and line unless specifically provided for by statute or regulation.

Delaware Fishing License Requirement
A Delaware fishing license is required for all non-resident anglers aged 16 and over fishing either fresh or tidal waters. Delaware fishing license information can be found at http://www.fw.delaware.gov/Fisheries/Pages/NewFishingLicense.aspx.

New York Fishing Registry Requirement

Bait Fish
No license is required for the taking of baitfish for personal use with the following gear:
1. Dip nets 24 inches diameter or less for the taking of Atlantic herring only (does not include river herring — alewife and blueback herring) for live bait. The taking or possession of river herring is prohibited.
2. Bait seines 50 feet long or less.
3. Cast nets 20 feet in diameter or less.
4. Lift or umbrella nets four feet square or less.
5. Not more than five killipots.
6. Not more than two miniature fykes or pots for the taking of eels for bait.

Fish Measurement

1. Lay fish flat on top of, or alongside a measuring rule, not measured over the body.
2. Fish are measured from the tip of the snout (mouth closed) to the longest part of the tail.

Prohibited Species
It is illegal to take, possess, land, purchase, or sell any of the following species:
- Atlantic sturgeon
- Atlantic salmon
- basking shark
- big eye sand tiger shark
- sand tiger shark
- sandbar shark
- shortnose sturgeon
- whale shark
- white shark
- river herring (alewife and blueback herring; see herring illustrations, page 14)
- See Sharks (page 11) for the full list of prohibited shark species

Sea Turtles & Marine Mammals
It is illegal to intentionally molest, kill or possess sea turtles or marine mammals, or to possess any part thereof.

Finfish

How to Release Hooked Fish
Proper handling and releasing techniques reduce fish mortality.
- Land fish as quickly as possible, except not when retrieving from depths of 40 feet or more. Fighting a fish to exhaustion increases mortality as does rapidly bringing up a fish through the changing water pressure and temperature gradients.
• Keep fish to be released in the water as much as possible. Plan ahead with tools and camera.
• Minimize physical injury. Do not touch gills or allow fish to flop around on deck.
• Carefully remove hooks using a dehooker or needle-nose pliers.
• Use plain hooks, not stainless, to rust away quickly if one must be left in a gut-hooked fish. Be prepared with long-handled dykes. Cut this line close to the hook’s eyelet.
• To bring a fish out of the water momentarily, use a neoprene net or one of knotless nylon. Handle the fish carefully using wet hands, wet cotton gloves or similar material to minimize loss of the fish’s protective slime layer.
• To revive lethargic fish, hold in a normal, upright position. Move the fish forward in an “S” or figure-8 pattern so that water flows over the gills only from front to back.
• Use circle hooks (not offset) for species that bite and flee, such as striped bass, weakfish or sea bass. Consider pinching hook barbs.

Filleting
The filleting at sea of all fish with a size limit, or any species of flatfish, is prohibited except for summer flounder; see Summer Flounder, page 12. No parts of any fish caught on a previous fishing trip shall be in possession. Party boats may fillet fish at sea if they obtain a Special Fillet Permit. Applications may be obtained from Fish and Wildlife’s Bureau of Marine Fisheries.

Black Drum
The minimum size limit for black drum is 16 inches in total length and the daily possession limit is three fish. There is no closed season for black drum.

Black Sea Bass
Black sea bass are measured along the midline from the snout to the end of the central portion of the tail, not to include the tail filaments. (See fish measuring example on page 10.) The black sea bass recreational minimum size remains at 12.5 inches. The 2015 recreational seasons and possession limits have changed. See details on the Marine Regulations chart, page 17. Visit our Web site at NJFishandWildlife.com or call the 24-hour marine fish “listen-only” information line at (609) 292-2083 for the latest regulation updates.

Bluefish
The possession limit for bluefish is 15 fish.

Red Drum
The red drum possession and size limits are one fish no less than 18 inches and not greater than 27 inches.

River Herring
The taking or possession of any river herring (alewife and blueback herring) in New Jersey’s marine, tidal and freshwaters is prohibited. This prohibition does not include Atlantic herring which may be retained and used as bait. See the fish ID illustrations on page 14 for herring species identification.

Sharks
The hammerhead shark recreational size limit is 78 inches fork length (FL). The minimum size limit for authorized shark species of the Aggregate Large Coastal and Pelagic groups remains at 54 inches fork length while all others do not have a size limit. See dogfish Note and measuring illustration for fork length.
The 2015 shark regulations complement existing federal shark regulations (see 2015 Federal Recreational Regulations table, page 18). However, the following additional measures are required for state waters:

- **In state waters, there is no minimum size limit for non-blacknose small coastal sharks and blacknose sharks** in the recreational fishery, but federal regulations include a 54-inch minimum size limit for blacknose and flnrooth small coastal sharks.
- **All sharks within the Aggregate Large Coastal and Hammerhead groups** will have a closed season within state waters from May 15 through July 15 to protect spawning female sharks during the pupping season.

*See page 18 footnote for species list defining shark groupings.*

All sharks harvested by recreational fishermen must have heads, tails and fins attached naturally to the carcass until landed. Anglers may still gut and bleed the carcass as long as the tail is not removed. Filleting sharks at sea is prohibited.

Recreational anglers should access the following National Oceanic and Atmospheric Administration website, http://www.nmfs.noaa.gov/stories/2012/08/docs/rec_shark_id_placard_2010.pdf to view the publication Sharks That Can Be Legally Retained By Recreational Anglers In The Atlantic Ocean, Caribbean Sea And Gulf Of Mexico, an excellent pictorial guide to identifying sharks that are legal to harvest. These shark species are prohibited from possession: Atlantic angel, basking, bigeye sixgill, bigeye thresher, bigeye tiger, bignose, Caribbean reef, Caribbean sharpnose, dusky, Galapagos, longfin mako, narrowtooth, night, sandbar, sandtiger, sevengill, silky, sixgill, smalltall, whale and white sharks.

**Note:** To differentiate sharks from dogfish—the smooth dogfish has flat, tiny teeth; the spiny dogfish has strong, dorsal spines, shorter than, and in front of, the dorsal fins. Neither are present in sharks.

**Striped Bass (includes Hybrid Striped Bass)**

The possession limit for striped bass/hybrid striped bass is two fish. The size limits are one fish at 28 inches to less than 43 inches and one fish equal to or greater than 43 inches. Anglers participating in the Striped Bass Bonus Program may possess a striped bass at 24 inches to less than 28 inches in length. It is illegal to take, catch or kill any striped bass from or in any marine waters of this state, by means of a net of any description, or by any methods other than angling with a hook and line or by spear fishing. It is illegal to possess any striped bass which is less than the legal minimum size of 28 inches unless in possession of a Striped Bass Bonus Permit which allows the possession of one fish at 24 inches to less than 28 inches. Harvest and possession of striped bass from federal waters (outside three miles) is prohibited. Sale of striped bass in New Jersey is prohibited.

**Striped Bass Closed Seasons**

No person may take, attempt to take, or have in possession any striped bass from the following closed waters:

- **Jan. 1–Feb. 28:** All waters closed except the Atlantic Ocean from zero to three miles offshore. All inlets and bays are delineated from ocean waters by a Colregs Demarcation line.
- **April 1–May 31:** Delaware River and Bay and their tributaries closed from the upstream side of the Calhoun St. bridge downstream to and including the Salem River and its tributaries.

**Note:** Non-offset circle hooks are required to reduce striped bass bycatch mortality while fishing with natural bait during the striped bass springtime spawning area closure within the Delaware River and its tributaries. This restriction does not apply to hook sizes smaller than size 2.

**Striped Bass Bonus Program**

The Striped Bass Bonus Program will continue this year, where anglers possessing a bonus permit may keep a striped bass at 24 inches to less than 28 inches. For 2015, the open season for this program will be September 1 through December 31.

The current allocation from the Atlantic States Marine Fisheries Commission is 215,912 pounds. Should New Jersey exceed this quota, any overage would be subtracted from the following year’s quota. Application Process: Striped Bass Bonus Program permits are only available online. Go to www.NJ.WildlifeLicense.com to complete the application and immediately print one Bonus Permit (application fee, $2). The permit is non-transferable and valid for the current calendar year. Only one permit can be used per day. Harvest reporting also must be online. Note that the Striped Bass Bonus Program application process may change later in 2015. For regulation or program updates, visit us at www.NJFishandWildlife.com/bonusbas.htm or check the marine fish ‘listen only’ information line (609) 292-2083.

**Striped Bass Bonus Permit Harvest Reporting:** All information on the Bonus Permit must be completed immediately after harvest and prior to transportation. After reporting harvest information at www.NJ.WildlifeLicense.com, anglers are then eligible to receive another bonus permit for the $2 application fee. Note: Harvest information must be reported online.

**Summer Flounder (Fluke)**

The summer flounder recreational minimum size limit remains at 18 inches and the possession limit remains five fish. The 2015 summer flounder recreational season will be open from May 22 to September 26. Anglers may fillet one legal-sized summer flounder from their daily possession limit catch for use as bait. This carcass, commonly known as the rack, shall be kept intact so it can be measured for compliance with the minimum size limit. No parts of any summer flounder caught on a previous fishing trip shall be in possession; only fish just caught on this outing.

**Weakfish (Gray & Spotted Seatrout)**

The current possession and minimum size limit for weakfish is one fish at least 15 inches in length.

**Winter Flounder**

The possession minimum and size limit for winter flounder is two fish at 12 inches. For winter flounder the open season is March 1–Dec 31.

**Additional Marine Fishing Regulations**

See pages 14–15 for the fish ID pages and pages 17–18 for the regulation charts.
New Jersey Saltwater Recreational Registry Program (NJSRRP)

ATTENTION: New Jersey Saltwater Anglers

REGISTER. You make a difference! It’s free, easy and required.

Intercept Surveys (APAIS) are conducted at public marine fishing access points (boat ramps, piers, beaches, jetties, bridges, marinas and more) to collect individual angler catch data, including species identification, total number of each species, length and weight measurements of individual fishes as well as some angler-specific information about the fishing trip and the angler’s fishing behavior.

These angler surveys will be conducted by individual states beginning next year. To date, New Jersey’s APAIS has been conducted by a contractor of the National Marine Fisheries Service. The interviews are conducted in person by trained field staff. The sites and dates are selected by a proportional random selection process. From these angler interviews a catch-per-unit- effort trip estimate can be made for each type of fish encountered, either observed or reported. These estimates are combined with the effort estimates—such as those collected through telephone interviews—to produce the catch and harvest estimates.

Each state’s saltwater registry serves as the contact list for these telephone interviews. Complete participation in the New Jersey Saltwater Recreational Registry Program is crucial to achieve accurate recreational fishing estimates which help to ensure healthy fisheries for the future.

Before you head out to catch your favorite saltwater fish this year, be sure to join the hundreds of thousands of anglers who have already registered with the New Jersey Saltwater Recreational Registry Program (NJSRRP).

Register at the NJ Saltwater Recreational Registry Program site:
www.saltwaterregistry.nj.gov

For more information on the APAIS, visit www.st.nmfs.noaa.gov/recreational-fisheries/in-depth/our-surveys-counting-catch-and-effort/survey-materials/access-point-angler-intercept-survey

Motor Boat Registration & Title Requirements

NJ Motor Vehicle Commission (MVC)

Registration

Most boats must be registered to operate on New Jersey waterways.
- All titled boats must be registered also.
- Any boat (including jet skis and non-titled watercraft), mechanically propelled (incl. electric motors), regardless of length, must be registered.
- Boats greater than 12 feet in length, regardless of propulsion means, must be titled and registered at an MVC office.
- Boats and marine equipment which need not be registered:
  - Those not based in New Jersey or operating here less than 180 consecutive days that are operating under a federally approved numbering system from another state
  - Ship’s lifeboats
  - Non-motorized vessels used exclusively on small lakes and ponds on private property
  - Racing vessels with New Jersey State Marine Police permit
  - Non-motorized inflatable device, surfboard, racing shell, dinghy, canoe or kayak
  - Non-motorized vessel less than 12 feet in length

Title

For use on New Jersey waterways, all boats more than 12 feet in length must be titled, with the exception of ship’s lifeboat, canoe, kayak, inflatable, surfboard, rowing scull, racing shell, tender/dinghy used for direct transportation between a vessel and shore for no other purposes.

Boat Operator License (MVC)

An operator license is required to operate power vessels on fresh, non-tidal waters such as lakes, creeks and rivers. (Minimum age 16 years; with certain exceptions.)

For More Information:

New Jersey Motor Vehicle Commission
(888) 486-3339 toll free in NJ or (609) 292-6500 from out-of-state
www.nj.gov/mvc/

Boat Safety Certificate (NJSP)

A boat safety certificate (from an approved boat safety course; see NJSP Web site, below) is required to operate a personal watercraft or power vessel, including electric motors, in NJ waters (tidal and non-tidal).

New Jersey State Police (NJSP)
(609) 882-2000
www.njsp.org/maritime
### Herring

- **Alewife** (a river herring)
  - Eye diameter greater than snout length
  - Large mouth
  - Upper jaw close to rear edge of eye
  - Largest in the herring family
  - May have a line of spots
  - No teeth on roof of mouth

- **Atlantic Herring**
  - Eye diameter less than snout length
  - Dorsal fin at midlength
  - Narrow body

- **Blueback Herring** (a river herring)
  - Eye diameter greater than snout length
  - Dorsal fin forward of midlength
  - Round snout overhangs closed mouth

- **Hickory Shad**
  - Lower jaw projects well beyond upper jaw when mouth closed

- **American Shad**
  - Eye diameter less than snout length
  - No teeth on roof of mouth

- **Gizzard Shad**
  - Lower jaw projects well beyond upper jaw when mouth closed

Alewife, American Shad, Blueback Herring and Hickory Shad illustrations ©Duane Raver; Atlantic Herring illustration ©Victor Young/NH Fish and Game Department; Gizzard Shad illustration courtesy of Texas Parks and Wildlife Department ©2012.

### Other Marine Species

- **Striped Bass**
- **Weakfish**
- **Bluefish** (Snapper)
- **Black Sea Bass**
- **Atlantic Croaker**
- **Winter Flounder**
- **Tautog** (Blackfish)
- **Black Drum**
- **Summer Flounder** (Fluke)
- **Red Drum**
- **Blue Crab**
- **Hard Clam**
Crustaceans

American Lobster
The legal possession size limit of whole lobsters, measured from the rear of the eye socket along a line parallel to the center line of the body shell to the rear of the body shell, shall be not less than 3½ inches nor greater than 5¼ inches. Lobster parts may not be possessed at sea or landed. There is no harvest or possession of lobster from April 30–May 31.

5. Recreational trot lines shall not exceed 150 feet in length with a maximum of 25 baits.
6. All pots and trot lines shall be marked with the identification number of the owner.
7. All crab pots must be tended at least once every 72 hours.
8. No floating line may be used on any crab pot or crab pot buoy.
9. No crab pot shall be placed in any area that would obstruct or impede navigation or in any creek less than 50 feet wide.
10. Only the owner, his agent or a law enforcement officer may raise or remove contents of a legally set fishing device.
11. Crabs taken with a bait seine may be retained for personal use only if the fisherman possesses a bait net license, and may not be bartered or sold unless the fisherman possesses a commercial crab license.
12. No crabs may be harvested from the Newark Bay Complex. For more information, see Health Advisory on page 26.

Crabs
1. Crabs may be taken recreationally with hand lines, manually operated collapsible traps or scoop nets without a license. A non-commercial crab pot license is required for the use of not more than two non-collapsible Chesapeake-style crab pots (see illustration on page 19) or two trot lines to harvest crabs. See page 19 for the non-commercial crab pot license information.
2. It is illegal to harvest or possess more than one bushel of crabs per day per person or offer for sale any crabs without having in your possession a valid commercial crabbing license.
3. Minimum size for crabs that may be harvested (measured from point to point of shell) are as follows:
   a) Peeler or shedding crab: 3 inches
   b) Soft crab: 3½ inches
   c) Hard crab: 4½ inches
4. All female crabs with eggs attached and all undersized crabs shall be returned to the water immediately.

Horseshoe Crabs
The harvest of horseshoe crabs is prohibited. Possession of horseshoe crabs is also prohibited except for those individuals holding a scientific collecting permit for research and education and those fishermen that can provide suitable documentation that the horseshoe crabs in their possession were harvested outside of New Jersey.

Mollusks
1. All persons must be licensed to harvest any shellfish. See license information, page 19. Shellfish means any species of benthic mollusks (except conch) including hard and soft clams, oysters, surf clams, bay scallops and mussels.
2. It is illegal to harvest shellfish from condemned waters, even for bait purposes. It is also illegal to harvest shellfish including surf clams from beaches adjacent to water classified as condemned. Shellfish water classification charts are available from license agents or any state shellfish office. See page 19 for shellfish license information. Charts are updated annually.
3. Shellfish harvesting is prohibited before sunrise and after sunset. Shellfish harvest is also prohibited on Sundays except in the seasonally approved areas of the Navesink and Shrewsbury rivers, when harvesting is permitted between Nov. 1 and April 30.
4. Harvesting shellfish on public grounds is restricted to the use of hand implements.
5. It is illegal to harvest shellfish from leased grounds. These grounds are delineated by stakes or buoys set by the lease holder. Charts of the leases may be examined at Fish and Wildlife’s Nacote Creek or Delaware Bay shellfish offices during regular business hours. Invasion onto leased grounds is punishable by penalties up to $3,000 and loss of all equipment.

Recreational Shellfishing
1. No holder of any recreational shellfish license may take more than a total of 150 shellfish (in aggregate) per day. See Shellfish License Information, page 19.
2. It is illegal to dredge shellfish on public grounds. Use of hand implements are the only legal harvest methods.
3. The minimum size of hard clams that may be harvested is 1½ inches in length. Clams less than 1½ inches in length must immediately be returned to the bottom from which they were taken. Specific seasons, regulations and size limits exist.
for oyster beds in Great Bay, Delaware Bay, plus the Mullica, Great Egg Harbor and Tuckahoe rivers. Check with the nearest shellfish office (Nacote Creek or Delaware Bay) for these detailed regulations.

4. Shells taken in the process of harvesting oysters must be culled from the live oysters and returned immediately to the area from where they were taken.

Commercial Shellfishing
1. Shellfish may be sold only to certified dealers. All persons selling shellfish commercially must tag each container listing date of harvest, name and address of the harvester and the waters from which the shellfish were harvested.

2. It is illegal to dredge shellfish on public grounds. All harvesting on public grounds is restricted to the use of hand implements.

3. Shells taken in the process of harvesting oysters must be culled from the live oysters and immediately returned to the area from where they were taken.

4. The minimum size of hard clams that may be harvested is 1½ inches in length. Clams less than 1½ inches must immediately be returned to the bottom from which they were taken. Specific seasons, regulations and size limits exist for oyster beds in Great Bay, Delaware Bay, plus the Mullica, Great Egg Harbor, and Tuckahoe rivers. Check with the nearest shellfish office (Nacote Creek or Delaware Bay) for these detailed regulations.

5. It is illegal to harvest shellfish on Sunday except in the seasonal waters of the Navesink and Shrewsbury rivers between Nov. 1 and April 30.

---

### 2015 New Jersey Recreational Fishing Seasons, Minimum Size and Possession Limits

Regulations remain in effect until changed. For the most current regulations, go to NJFishandWildlife.com or call the marine fish “listen-only” information line at (609) 292-2083. Regulations in red are new this year. See page 10 for how to measure fish.

# 2015 Federal Recreational Fishing Regulations for Minimum Size, Possession Limits and Seasons

See page 10 for how to measure fish. See [Recreational Minimum Size, Possession Limits and Seasons](https://www.nmfs.noaa.gov) (page 17) for state waters listings of species not included in these regulations. For federal regulation questions, please contact the National Marine Fisheries Service at (978) 281-9260. For current federal waters regulations (3–200 nm), refer to [www.nmfs.noaa.gov/sfa/hms/](https://www.nmfs.noaa.gov/sfa/hms/) or call (727) 824-5326. Regulations concerning highly migratory species (HMS) such as tuna, swordfish, shark and billfish, are subject to change. Refer to [www.nmfs.noaa.gov/sfa/hms/](https://www.nmfs.noaa.gov/sfa/hms/) for a list of complete federal regulations for highly migratory species. For questions/clarification of the federal highly migratory species regulations, contact the National Marine Fisheries Service at (727) 821-2347 or go to www.nmfs.noaa.gov.

## Tables

### Cod
- **Species**: Cod
- **Season**: Year round
- **Minimum Size**: 22"
- **Possession Limit**: 10 per person per day

### Striped Bass
- **Species**: Striped Bass
- **Season**: NA
- **Minimum Size**: NA
- **Possession Limit**: No possession allowed in EEZ

### Dolphin (Mahi mahi)
- **Species**: Dolphin (Mahi mahi)
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: 10 per day, not to exceed 60 per vessel, which ever is less — except on a charter or headboat, then 10 per paying passenger.

### Marlin, White
- **Species**: Marlin, White
- **Season**: Year round
- **Minimum Size**: 66" lower jaw–fork length
- **Possession Limit**: None

### Marlin, Blue
- **Species**: Marlin, Blue
- **Season**: Year round
- **Minimum Size**: 99" lower jaw–fork length
- **Possession Limit**: None

### Roundscale Spearfish
- **Species**: Roundscale Spearfish
- **Season**: Year round
- **Minimum Size**: 66" lower jaw–fork length
- **Possession Limit**: None

### Sailfish
- **Species**: Sailfish
- **Season**: Year round
- **Minimum Size**: 63" lower jaw–fork length
- **Possession Limit**: None

### Spearfish, Longbill
- **Species**: Spearfish, Longbill
- **Season**: None
- **Minimum Size**: None
- **Possession Limit**: Prohibited

### Tilefish, Blueline
- **Species**: Tilefish, Blueline
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: 7 per angler per trip

### Tilefish, Golden
- **Species**: Tilefish, Golden
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: 8 per angler per trip

### Swordfish
- **Species**: Swordfish
- **Season**: Year round
- **Minimum Size**: 47" lower jaw–fork length if the head is naturally attached or 25" caudal keel if the head has been removed.
- **Possession Limit**: For anglers: 1 per person, no more than 4 per vessel per trip. For charter vessels: 1 per paying passenger, no more than 6 per vessel per trip. For headboat vessels: 1 per paying passenger, no more than 15 per vessel per trip.

### Tuna, Albacore (Longfin)
- **Species**: Tuna, Albacore (Longfin)
- **Season**: Year round
- **Minimum Size**: 27" curved fork length
- **Possession Limit**: None

### Tuna, Bigeye
- **Species**: Tuna, Bigeye
- **Season**: Jan. 1–Dec. 31 or until season is closed.
- **Minimum Size**: 27" to <73" curved fork length and one trophy fish ≥ 73" curved fork length per vessel per year
- **Possession Limit**: Limits can change during the season. Prior to departure, check [https://hmspermits.noaa.gov](https://hmspermits.noaa.gov) or call (888) 872-8862.

### Tuna, Bluefin
- **Species**: Tuna, Bluefin
- **Season**: Year round
- **Minimum Size**: 27" curved fork length
- **Possession Limit**: None

### Tuna, Skipjack
- **Species**: Tuna, Skipjack
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: None

### Tuna, Yellowfin
- **Species**: Tuna, Yellowfin
- **Season**: Year round
- **Minimum Size**: 27" curved fork length
- **Possession Limit**: 3 per person per trip

### Sharks
- **Species**: Sharks
- **Season**: The Aggregate Large Coastal Group and Hammerhead group seasons are July 1 to Dec. 31. All others are year round.
- **Minimum Size**: Aggregate Large Coastal and Pelagic: 54" fork length Hammerheads: 78" fork length
- **Possession Limit**: Other listed sharks: None

### Wahoo
- **Species**: Wahoo
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: 2 per person per day

### Wreckfish
- **Species**: Wreckfish
- **Season**: Year round
- **Minimum Size**: None
- **Possession Limit**: Prohibited

---

*Shark Species That May Be Kept (Authorized Species): Aggregate Large Coastal Group —blacktip, bull, lemon, nurse, tiger, spinner; Hammerhead Group — scalloped hammerhead, smooth hammerhead, great hammerhead; Non-Blacknose Small Coastal Group — Atlantic sharpnose, bonnethead, bonito, sandbar, sand tiger, seven-gill, silky, sixgill, smalltail, whale and white. Pelagic Group — shortfin mako, blue, porbeagle, oceanic whitetip and common thresher. Shark Species That MUST Be Released (Prohibited Species): Atlantic angel, basking, bigeye sand tiger, bigeye sixgill, bigeye thresher, bluntnose, Caribbean reef, Caribbean sharpnose, dusky, Galapagos, longfin mako, narrowtooth, night, sandbar, sand tiger, seven-gill, silky, sixgill, smalltail, whale and white.*
Shellfish License Information

A shellfish license (formerly called clamming) is required for harvesting all species of benthic mollusks (except conchs, addressed in the commercial marine fisheries regulations), including, but not limited to, hard and soft clams, surf clams, oysters, bay scallops and mussels. Other specific commercial shellfish licenses exist such as clam dredge, Delaware Bay oyster dredge boat and Delaware Bay licenses to harvest in Areas 1, 2 and 3.

Anyone engaged in any shellfish harvesting activity with someone holding a commercial shellfish license must also possess their own commercial shellfish license.

The resident senior citizen shellfish license is a lifetime license. For shellfishing regulations, see pages 16–17.

Shellfish License Fees

- **Resident recreational shellfish**: $10
  Harvest limit of 150 shellfish (in aggregate) per day. Sale of catch prohibited.
- **Non-resident recreational shellfish**: $20
  Harvest limit of 150 shellfish (in aggregate) per day. Sale of catch prohibited. License valid only during the months of June, July, August and September.
- **Juvenile recreational shellfish**: $2
  For persons under 14 years of age. Subject to same restrictions as resident or nonresident adult recreational license holders.
- **Resident commercial shellfish**: $50
  Unlimited harvest. Shellfish may be sold only to certified dealers.
- **Non-resident Commercial Shellfish**: $250
  Unlimited harvest. Shellfish may be sold to certified dealers only.
- **Resident senior citizen recreational shellfish license**: FREE ($2 application fee)
  NJ residents age 62 years or older. Harvest limit, 150 shellfish (in aggregate) per day. Sale of shellfish prohibited.
- **Disabled veterans**: Fish and Wildlife-certified disabled veterans are eligible for free shellfish license at any shellfish license agent location. To become certified, call (609) 984-6213.

Shellfish License Information

- **Resident commercial shellfish license**: $10
  Harvest limit of 150 shellfish (in aggregate) per day. Sale of catch prohibited.
- **Non-resident commercial shellfish**: $20
  Harvest limit of 150 shellfish (in aggregate) per day. Sale of catch prohibited. License valid only during the months of June, July, August and September.
- **Juvenile recreational shellfish**: $2
  For persons under 14 years of age. Subject to same restrictions as resident or nonresident adult recreational license holders.
- **Resident commercial shellfish**: $50
  Unlimited harvest. Shellfish may be sold only to certified dealers.
- **Non-resident Commercial Shellfish**: $250
  Unlimited harvest. Shellfish may be sold to certified dealers only.
- **Resident senior citizen recreational shellfish license**: FREE ($2 application fee)
  NJ residents age 62 years or older. Harvest limit, 150 shellfish (in aggregate) per day. Sale of shellfish prohibited.
- **Disabled veterans**: Fish and Wildlife-certified disabled veterans are eligible for free shellfish license at any shellfish license agent location. To become certified, call (609) 984-6213.

Terrapin Excluders and Biodegradable Panels Are Required on Chesapeake-Style Crab Pots

Users of non-collapsible, Chesapeake-style crab pots should know that all pots set in any body of water less than 150 feet wide at mean low tide or in any manmade lagoon MUST include diamondback terrapin excluder devices. In addition, all non-collapsible, Chesapeake-style crab pots set in any body of water MUST include biodegradable panels. These crab pot modifications will help reduce the unintentional drowning of terrapins and allow for escapement of these and other species in the event that pots are lost or abandoned. Terrapin exclusion devices must be no larger than 2-inch high by 6-inch wide and securely fastened inside each funnel entrance. Biodegradable panels must measure at least 6½-inch wide by 5-inch high and be located in the upper section of the crab pot. The panel must be constructed of, or fastened to the pot with wood, lath, cotton, hemp, sisal or jute twine not greater than ¼" diameter, or non-stainless steel, uncoated ferrous metal not greater than ¼" diameter. The door or a side of the pot may serve as the biodegradable panel ONLY if it is fastened to the pot with any of the material specified above. Crabbers should be aware that ALL non-collapsible, Chesapeake-style crab pots MUST be licensed and marked with the gear identification number of the owner. For crab pot license information and regulations, see the regulations on page 16 and license agents below.

Crab Pot License Information

Crab Pot licenses are available at all agent locations: Recreational Crab Pot/Trot Line Licenses and Non-Commercial Crab Dredge Licenses. Licenses are available for purchase online at: www.NJWildlifeLicense.com or at any Fish and Wildlife-certified license agent including those license agents listed below. For the most current list of Fish and Wildlife-certified license agents, go to NJFishandWildlife.com/agentlist.htm.

**Crab Pot License Fees**

- **Recreational crab pot/trot line license**: $2
  Harvest limit of one bushel per day. Refer to the shellfish regulations on page 16 for all recreational crabbing regulations.
- **Non-commercial crab dredge license**: $15
  Harvest limit of one bushel per day during the crab dredge season. See page 16 for all recreational crab regulations.

A nice stringer of flounder and triggerfish were speared by Jason Hearon on the Wildwood Reef.

The weather is perfect for early June with a slight land breeze, high 70s air temp, mid 60s water temp, rising tide and no swell. You and your buddy double-check the gear while planning for the day’s adventures. Your heart begins racing as time draws near but you tell yourself to calm down, breath slow, relax.

When you gently slide into the water, your instincts and training take over. You have entered the beautiful and alien ocean world. Your eyes take a moment to adjust as your ears hear the rhythmic clicks and pops of sealife. Descending into the nutrient-rich green abyss, you begin to see soft coral, sea stars, mussels and crabs. It’s hard to believe there is so much life! Tautog, seabass and lobster come into view. Out of the corner of your mask you catch movement, then a puff of mud and it’s gone! A huge flounder, the biggest you have ever seen, has disappeared. That’s the way it goes when spearfishing in New Jersey. You don’t always get dinner, but you always make a memory.

The New Jersey coastline, along with its many wrecks and reefs, is a diver’s paradise. Yes, New Jersey. While we do not have the tropical blue water of the Bahamas, the Garden State offers many great opportunities in your back yard.
New Jersey’s vast artificial reef system (see reef article, page 6), the many natural undersea formations plus the large number of shipwrecks all create terrific habitat for fish as well as for diving. The best part: to access these fish meccas there is no need to hop on a plane bound for the tropics. Numerous exciting diving spots are accessible either from shore, private boats or by chartering a dive boat. In many cases the dive opportunities are close enough to go after work and be home in time for a late dinner. Hopefully, dinner will include fresh seafood.

This spearfishing overview can put you well on your way to bringing home great memories and tasty table fare from New Jersey’s marine domain.

Training

There are two approaches for exploring the underwater world: freediving and scuba diving. Whichever you choose, training is paramount and cultivates safe and responsible spearfishing practices. Freediving classes are now readily available. These not only increase your level of safety; they increase the amount of time you can safely stay underwater. A freedive class is taught by a certified instructor in a controlled environment.

Scuba classes are available at any local dive shop. Also taught by certified instructors in a controlled environment, a scuba course will teach you how to safely use the equipment and certify you to become a scuba diver. No matter which path you choose make sure you get trained by a reputable agency.

Basic Diving Gear

Acquiring equipment follows training. Diving with a dive charter or through your dive shop allows you to rent most of the equipment, a great way to decide what equipment works best prior to buying your own. Whether you decide to free dive or scuba dive the first piece of essential equipment is a well-fitted mask to keep out water so you can see the underwater world. A snorkel (yes, it’s also needed for scuba diving) and fins are additional essential pieces of gear. A snorkel allows you to breathe on the surface while the mask is still under water. Fins are needed for mobility with their wide surface area propelling a diver through the water.

Additional gear includes a wetsuit for warmth and protection and either a dive knife or dive scissors. Last but not least, get a “dive down” flag. All dive vessels must fly a dive down flag when divers are in the water to alert other boats to go slow and stay clear of the area. Even when diving from shore you must use a dive flag.

For those wanting to start with a speargun, several companies make relatively inexpensive, higher-quality models. The main advantage of a speargun over a pole spear is the shooting distance. Remember this advantage is lost when the water gets cloudy and when the gun is not agile enough to make the quick shot on that huge flounder buried in the sand.

Spearfishing Ethics

Even those new to the sport are responsible to maintain the standards practiced by spearfishing enthusiasts worldwide. Unlike anglers using rod and reel, there is no catch and release. You must only shoot what you can eat—no more. This allows our sport to be one of the most environmentally friendly forms of fishing by creating no bycatch. Take only clean ethical shots and follow all season, size and limit regulations. As visitors to the underwater world, we must respect the habitat and the creatures that live there by leaving behind only bubbles.

Spearfishing Gear

When it comes to spearfishing equipment, it’s best to keep it simple. The less complicated your equipment the less likely to fail and the easier to use. A pole spear is a great way to start; they are inexpensive and can last a long time. While not as flashy-looking as a wood gun, the pole spear is probably the ideal weapon for hunting summer flounder and around rocks.

Safety! Safety! Safety!

Safety is everybody’s responsibility. Whether on—or in—the water, be cautious of people around you. Diver down and alpha flags must be respected by everyone.

Remember to check your gear—and your buddy’s gear—thoroughly. When scuba diving, always monitor your air and bottom time as well as that of your dive buddy. When free diving, strictly adhere to the one dive up—one dive down approach. Remember all safety tips from your diver training and always dive within your limits.

Remember, a dive buddy is essential for safety and can add to the fun. By working together, both will be safer, more efficient hunters and have some-one with whom to share stories at the day’s end.

Be Aware: Spearfishing Requires Extra Precautions!

- Never load a speargun out of the water.
- Never point a spear at anything unless you intend to harvest it.
- Treat every gun as if it were loaded.
- Know your target and what’s beyond.

Being a safe and responsible spearfisher can bring years of enjoyment. New Jersey offers many opportunities for spearfishing along our coast. Get out and enjoy this great marine resource close to home. Be sure to check our Fish and Wildlife’s Record Fish Program (http://NJFishandWildlife.com/recfish-salt.html) with a new spearfishing category which includes many species that frequent New Jersey wrecks and reefs!
The Skillful Angler Program is designed both to supplement the New Jersey Record Fish Program and to acknowledge that many anglers catch freshwater and marine fish that are not record size but are still worthy of recognition because the size and weight of the fish sufficiently tested the angler’s skill. Open to resident and non-resident anglers. All fish must be caught in New Jersey waters using a hook and line during legally open seasons.

Saltwater species taken from a boat must have been caught from a boat that left from, and returned to, a New Jersey port during the same trip.

The Program has three main divisions: Adult (for anglers age 16 and older), Junior (under age 16) and Catch and Release (based on length). A clear, side-view photo that allows accurate species identification must be included with each application. Anglers qualifying for a Skillful Angler award receive a certificate with an artistic rendering of the fish species they caught as a testament to their achievement.

The new Skillful Angler Program now recognizes different levels of fishing expertise. An angler who submits five applications of qualifying size for the same species will receive a Specialist Certificate. An angler who submits five applications of qualifying fish of different species will receive a Master Certificate. Catch 10 or more qualifying species of fish within the year, and the angler will earn an Elite Angler Certificate. The Program also now recognizes the first fish caught no matter the age of the angler. Qualified anglers will receive a First Fish certificate.

Also new this year, the program is introducing four marine “Slam” categories — Inshore Slam 1, Inshore Slam 2, Offshore Pelagics Slam and Marlin Slam. For the Inshore Slam 1, an angler must submit qualifying applications for a Striped Bass, Bluefish and Fluke. For the Inshore Slam 2, an angler must submit qualifying applications for Black Sea Bass, Tautog, and Weakfish. The Offshore Pelagics Slam will be obtained if an angler submits qualifying applications for Bluefin Tuna, Bigeye Tuna, Yellowfin Tuna and Dolphin. For the Marlin Slam, an angler must submit qualifying applications for a White Marlin and a Blue Marlin.

Each month, the leaders of each category and species will be posted on our Skillful Angler Leader Board web page. At the end of the year, special recognition is given to anglers who catch the largest fish in each species category. The winner of each category is sent a special certificate recognizing his/her accomplishment as the best of New Jersey’s Skillful Anglers.

Fish must be measured from the tip of the nose (with mouth closed) to the tip of the tail. For catch and release categories, the fish must be measured and photographed alongside a ruler. For Adult/Junior division, fish must be weighed and measured by fishing license agents, tackle shops or authorized Fish and Wildlife fisheries biologists.

Anglers must submit two photographs of the fish caught, one at the site of the catch and one with the fish alongside a ruler for clear identification and measurement verification. Take time to compose good quality (and high resolution) photos to submit with your application. The best photo may be selected for publication in this Digest next year! Include your e-mail address on back of the photo so we may contact you for a digital copy of your print.

Ocean Fun Day

Never surf fished before?

Join New Jersey Division of Fish and Wildlife educators at Ocean Fun Days to learn how!

May 16, 2015 from 11:30 a.m.–1:30 p.m. at Island Beach State Park.

- Learn proper surf fishing techniques and tricks.
- All equipment and supplies will be provided. Ages 12 and up.

Participants may join in the Governor’s Surf Fishing Tournament (see page 9 for Tournament details) the next day using provided equipment. Tournament registration fees will apply.

The New Jersey State Record Fish Program requires a separate application and is based on weight alone. Scale certification documentation and a weighmaster’s signature are necessary. Other rules apply. Visit Fish and Wildlife’s Web site at NJFishandWildlife.com for a complete list of current state records. See also page 24.
New Jersey State Federation of Sportmen’s Clubs

If you care about...

• Wise management of fish and wildlife populations
• Protection and enhancement of natural lands and waters
• Preservation of traditional outdoor sports

Then get involved!

• Stay informed on issues affecting NJ sportsmen and sportswomen
• Make an impact on outdoor issues
• Meet others who share similar sporting interests
• Have fun and participate in Federation-sponsored activities: jamborees, clay target shoots, tournaments, dinners, conventions, and more!

Membership

New Jersey Division of Fish and Wildlife’s Record Fish Program honors anglers who catch the largest of select species of freshwater and saltwater fish. Record size is based on weight alone; there are no line classes. Currently there are 76 marine species eligible for entry into the program which includes a new spearfishing category with 17 additional species. See A Spearfishing Primer, page 20.

Anglers are reminded that the objective of the Record Fish Program is to increase awareness of fishing opportunities for species that are regularly sought and routinely found on or off the coast of New Jersey. The original list of 72 species was pared down with that objective in mind.

Twelve species are now retired from the list of program-eligible fish, but remain on a separate list posted on Fish and Wildlife’s Web site. One historical catch is also retired and posted on the list.

Anglers should be aware of the procedure in effect for entering the Record Fish Program. First, separate applications are required for freshwater and saltwater species. Second, for saltwater entries, it is now mandatory that a marine biologist inspect any potential record fish, as identification solely by photo is not always accurate. Anglers must call Fish and Wildlife’s Nacote Creek Research Station at (609) 748-2020 to make arrangements for inspection. In most instances, the fish must be transported to this office in Port Republic. However, in the case of extremely large fish (i.e., shark and tuna), a biologist should be available to travel for dockside inspection.

Note that all scale certification requirements still apply, including a valid Certificate of Inspection/Test Report and current Registration Certificate issued by the County Office of Weights and Measures. The entry deadline is now no later than one month after the date of catch. Note that the triggerfish category is now defined as gray triggerfish.

For a complete list of state record fish or to print an application with complete program rules, visit the Division of Fish and Wildlife’s Web site at NJFishandWildlife.com/fishing.htm.

*Fish was previously certified by the IGFA as a world record.

For information concerning the New Jersey State Record Fish or Skillful Angler programs, visit the New Jersey Division of Fish and Wildlife’s Web site at NJFishandWildlife.com.
Spearfishing Category

In 2014, the NJ Record Fish Program expanded with the addition of a Spearfishing category for saltwater. Seventeen (17) species commonly sought after by spearfishers are part of the Program. Spearfishers now have a unique opportunity to be recognized in New Jersey’s Record Fish Program. Anglers are reminded that the objective of the Record Fish Program is to increase the awareness of fishing opportunities for species that are regularly sought after and routinely found in or off the coast of New Jersey.

* Fish was recognized by the International Underwater Spearfishing Association as a world record.
Eating Fish And Crabs Caught In New Jersey Waters

Fishing provides enjoyable and relaxing recreation. Fish are an excellent source of protein and other nutrients and play a role in maintaining a healthy, well-balanced diet. Many anglers enjoy cooking and eating their own catch. However, elevated levels of potentially harmful chemical contaminants such as dioxin, polychlorinated biphenyls (PCBs), pesticides and mercury have been found in certain fish and crabs in some New Jersey waters. Fish consumption advisories have been adopted to guide citizens on safe consumption practices.

To reduce exposure to harmful chemical contaminants when preparing and eating the fish species taken from the identified waters, it is essential to follow the guidelines provided. The DEP encourages you to consult the Fish Smart-Eat Smart Fish Advisory Guide or www.FishSmartEatSmartNJ.org when making decisions about eating recreationally caught fish and crabs.

The current list of fish consumption advisories consists of statewide, regional and water body-specific warnings for a variety of fish species and fish consumers. The New Jersey Department of Environmental Protection (DEP) and the Department of Health and Senior Services have prepared new "how to" electronic pamphlets on cleaning and cooking your catch to reduce your exposure to these harmful chemicals. These e-pamphlets are downloadable in multiple languages.

For a complete list of state and federal marine fish consumption advisories visit: www.FishSmartEatSmartNJ.org.

The fish consumption advisories and Fish Smart-Eat Smart website are updated periodically and are available online or from the Office of Science at (609) 984-6070 and through the Division of Health and Senior Services at (609) 826-4935.

Check online for fish consumption advisories on the local water body in which you fish! Go to www.FishSmartEatSmartNJ.org.

NOW AVAILABLE in Multiple Languages!

WARNING: Wildlife Hazard
Please properly dispose of all fishing line. Plastic debris can endanger aquatic life and snare propellers.

Could this be your line?

Shore-based Fishing Opportunity at Island Beach State Park Boasted Unique Regulations Last Year

By Maryellen Gordon, Senior Fisheries Biologist | Lauren “Maggie” Sager, Seasonal Fisheries Technician
Bryan Carter, Seasonal Fisheries Technician | Jonathan Klotz, Seasonal Fisheries Technician
Erin Mulvenna, Seasonal Fisheries Technician

Last year’s Shore-based Enhanced Fishing Opportunity Program at Island Beach State Park (IBSP) allowed anglers to keep smaller fish while collecting recreational harvest data. The bag limit was reduced to two fish from IBSP shorelines, but the size limit was also reduced to a 16-inch minimum total length. Summer flounder caught between 16 and less than 18 inches were required to be brought to a check station to receive a tag, confirming that the fish was legally taken from IBSP waters. Anglers that caught two 16-inch or greater summer flounder at IBSP could still attempt to fill a New Jersey daily bag limit of five fish, but the other three summer flounder had to be taken outside of IBSP at 18 inches or greater.

At the check station, fish were measured, weighed then tagged to confirm legal harvest within the park. A creel survey ran concurrently with the Program, with agency staff interviewing anglers providing valuable demographic information, catch and effort data as well as biological data for all species caught at the park during the Program season. Data collection included species name, length, weight, disposition and number of fish caught.

During this Program, 176 summer flounder between 16 and less than 18 inches were tagged and 271 creel surveys were conducted. A total of 337 fish were caught amongst those anglers, 155 of which were summer flounder; 48 were available catch with the other 289 fish released.

Program Overview
Marine Fisheries Angler Program: Shore-based Enhanced Fishing Opportunity Program
Species: Summer flounder
Where: Island Beach State Park
When: June 14, 2014 through September 27, 2014
Regulations: A two fish bag limit; ≥ 16 inches; shore fishing only
Goal: To estimate the additional landings of the reduced size limit to determine if it affects NJ’s overall recreational harvest target.

Attention Boaters
Keep Our Waters Clean—Use Pumpouts

Ready To Serve Boaters! Visit marina pumpout facilities or contact one of the pumpout boats. A complete listing of operational pumpout facilities at marinas and detailed information on the pumpout boats can be found at NJBoating.org.

Proper maintenance and operation of your on-board toilet and holding tank are critical to ensure they function properly.

• Always use sufficient water when flushing
• Use toilet paper designed for use in marine/RV systems
• Have your marina inspect your onboard toilet system to make sure it is operating properly

Operation Game Thief

Report Abuse of our Outdoor Heritage!

1-855-OGT-TIPS

24 Hours a Day, Seven Days a Week

The person who poaches, pollutes habitat and abuses public land tarnishes the image of sportsmen and robs us of our fish and wildlife as well as tax and license dollars. You can make a difference.

Call OGT to report:
• Negligent use of firearms
• Over the limits for game and fish
• Commercial exploitation of fish and wildlife
• Pollution of habitat, dumping on state land
• Destruction of signs and state property
• Illegal killing, taking or possession of any wildlife

It's Free. It's Confidential.
You May Be Eligible for a Reward.

Funded by the New Jersey State Federation of Sportsmen’s Clubs.
Designed to encourage sportsmen to report poaching and wildlife crimes.
