Subject Updated LSRP Supplemental Certification for Initial Ground Water RAP Application for Monitored Natural Attenuation (MNA) and instructions are now available!

Contaminated Site Remediation & Redevelopment (CSRR) is pleased to announce the availability of the updated [LSRP Supplemental Certification for Initial Ground Water RAP Application for MNA](#) and [instructions](#) (Version 1.3). CSRR has made these changes to the form and instructions based on feedback from Licensed Site Remediation Professionals (LSRPs) and to address frequently asked questions.

Significant changes to the LSRP Supplemental Certification for Initial Ground Water RAP Application for MNA include, but are not limited to, the list below. See the [change log](#) for a full list of changes.

- Removed the 3 orders of magnitude individual contaminant concentration criteria from the form header;
- Changed the no bedrock ground water contamination criterion to allow for certain conditions where the form can be used for bedrock ground water contamination in the form header;
- Clarification in the form header that the form can be used if the Initial Ground Water RAP Application submitted is addressing multiple releases at a site with the same co-permittees;
- Removed the Point of Entry Treatment (POET) water system(s), vapor intrusion (VI) engineering control(s)/mitigation system(s), and the VI Long-Term Monitoring Plan or a VI Change in Use Evaluation Plan criteria from the form header; and
- Added a certification subsection for the POET water system(s) in Section B.

These changes were made to allow the use of this LSRP Supplemental Certification Form for a broad range of Ground Water RAP Applications. CSRR strongly encourages the use of this form by LSRPs for sites that meet the criteria/conditions to achieve greater efficiency in the permitting process and further reduce the backlog of RAP Applications.

Questions regarding the LSRP Supplemental Certification for Initial Ground Water RAP Application for MNA should be directed to Alexander Shelkonovzeff at Alexander.Shelkonovzeff@dep.nj.gov.

The form and instructions are available in the Forms Library under Remedial Action Permits: <https://dep.nj.gov/srp/forms/>. As a reminder, the Forms Library should be checked frequently for the current version of all forms.

The New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.
